

# SOLUTION MODULAR

**STANDARD CONTAINER  
INTRODUCTION**

**HOUSESPACE**

## COMPONENTS MODEL-S20 FLATPACK CONTAINER HOUSE

### Structure

Main structure is made from special profile.  
After galvanization, marine paint is coated to meet the sea transportation requirement.  
That makes the lifetime up to 20 years even in humid areas.

### Corner Cast

Four container corners ensure cabin can be lifted easily,  
and jointed with each other in three direction.

### Wall panel & Electrical system

Prefabricated the indoor electrical system  
in the factory, and the wires are sunken in  
the wall panel to let the house looks more  
beautiful, can change the socket and wires  
to meet your local requirement.

Thickness options: 50 / 75 / 100 mm

Insulation options: GLASS WOOL / ROCK WOOL  
/ EPS / NEOPOR

### Roof

Patent design, 360° sealing at joint venture,  
no single nail on it, better dampproof ability.,

### Drainage

Structural drainage system, it has gutter  
around the top structure, through the four  
corner casts and built in drain pipe, which  
keeps the room dry and prevents leakage.

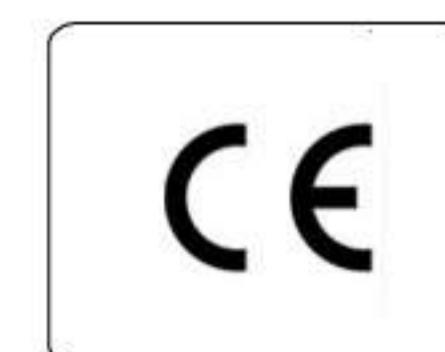

### Door & Windows

Selected good quality steel door,  
hollow glass windows with guardrail  
and screen, promote the insulation  
and safety of the whole house.

### Wall decoration

The standard wall is  
steel plate + insulation + steel plate, white gray,  
can add exterior plastering, glass curtain wall,  
painting or wall paper to make it unique and modern.
